

Sauermann's new Delta Pack 80x60

Ensures quick and easy installation and maintenance

Delta Pack 80x60 includes a new elbow design that can be easily opened by a simple finger push -- no tool is needed. Its streamlined design complements wall mounted air conditioning units.

It includes the Si-10 UNIVERS'L pump which incorporates the latest in piston-pump technology.

The key benefits of Sauermann's new Delta Pack:

	✓ FEATURE	✓ BENEFIT
Pump	High performance pump 20 l/hr, patented technology	Pump can discharge particles of biofilm, no filter required
	14m maximum discharge head, 4 ltr/hr at 10m head	Standard competitors pumps can not match this performance
	Plug in power supply cable	Quick and easy to replace and/or maintain the pump
	Low operating sound level independently tested 22 dBA	Independent tested and true fact supported by certification
	Clear view quick release sump	For quick inspection
	Drain safe device factory fitted to the discharge pipe	Gives the installer flexibility on site to terminate the discharge line in any area or position
	Universal replacement pump	Can be used as a replacement pump for other manufacturers products
Trunking System	New quick fit/release corner piece	Makes the installation and maintenance easier
	No connecting parts	No tricky connector piece between the elbow and trunking, making for a much quicker installation
	New rubber spacer	To give close fit to the A/C unit
	Easy fit 80 x 60mm trunking with pre drill holes	Installer doesn't have to spend time drilling the trunking
	Available in new brilliant	To look correct next to new modern wall mounted A/C units
	Improved design with smart guideline system for pipe line shaping	Designed to allow 3/8 5/8 insulated pipework
	Fixing holes re-positioned	Removing the possibility of fragmented and cracked plaster board
Film protection on the trunking and elbow	Keeps the trunking and elbow clean during the installation	
Installation Accessories	A/C unit drain connection pipe is translucent	To enable the installer to see water flow or blockages
	A/C unit drain connection pipe has been extended from 500mm to 650mm	To allow connection to the A/C unit elephants trunk drain pipe
	90 degree elbow supplied in the kit	To allow the installer to cut the connect pipe and connect vertically to the drip tray drain outlet
	Spring clips supplied in Kit	For secure air tight pipe connections that can be re-used after maintenance
Packaging	New packaging design	Attractive design showing clear images QR code direct to installation video

QUICK FIT & RELEASE
Easy installation - Easy maintenance
